These are finding from upgrading the Enterprise client and running it against the production database. This will help determine whether the client can be deployed in advance and who might be affected.

The login screen has a 'secure connection icon and statement' (secure against TEST pathway)

Secure icon is present in the GUI too

Production

Image icon doesn't show in Production when the client is the new version

**Philips IntelliSpace PACS Enterprise**

User: Nastiuk, Kevin   Last successful logon was at 07:25:06 on 06/07/2018 from IP 10.19.5.54

Patient Lookup

iQuery (DICOM Q/R) doesn't work with the client upgraded to the new version:
v. 4.4.553 in production

Failed to retrieve DICOM data. Request timeout with the server.   PH
